Agreement form for Yangming High School students to Join the “International Class”

I _____ and my guardian _____ have participated in or have watched the International Class seminar. I completely understand and agree to the terms of this program and accept personal responsibility for my studies within it.

➤ **To parents, please ensure you and your children are aware and understand the following points.**

- a. Be clear about the rationale of the international class program, curriculum specifications, curriculum framework (see Appendix 6), and graduation requirements. The curriculum materials of this program are mainly teacher generated English materials, supplemented by foreign textbooks depending on the teaching needs of teachers. Assessments and assignments are mainly in English, and they will fully comply with the school's schedule.
- b. If students require individual needs for Chinese language enhancement, individualized courses, and remedial after-school lessons, parents are responsible for the costs and must comply with the school's schedule and regulations.
- c. Participate in the Parent-Teacher Association (PTA) Meeting, course selection meeting, education system meeting, etc. These meetings are essential to helping your children to complete each semester.
- d. Encourage and lead your children to follow and practice Academic integrity.
- e. This class doesn't offer a National Defense Education course. That means that students will be unable to substitute the draft requirements for High School education.
- f. The instructional assessment system will be different from regular classes that means you cannot enter Taiwan's university using the Star Plan through Taiwan's College Entrance System.
- g. Evaluate your children's language level prior to starting class. His or her Chinese and English abilities should be above the A2 level. Please also make sure he or she has the ability and motivation to self-learn.
- h. Each semester, expect to pay a tuition fee. This class's students will also need to pay a “personal course” fee to our school's parents' association account. This payment will pay for the courses that international class students need. The pay list will be uploaded at the end of each semester.

➤ **To students, please be aware of the following,**

- a. Be clear about the course and program regulations, graduation requirements, and curriculum framework (see Appendix 6). The curriculum materials of this program are mainly teacher generated English materials, supplemented by foreign textbooks depending on the teaching needs of teachers. Assessments and assignments are mainly in English, and they will fully comply with the school's schedule.
- b. Please follow the rules of the school and each class. Please complete assignments on time.
- c. Practice and embody the principles of academic integrity.
- d. This class doesn't offer a National Defense Education course. That means that students will be unable to substitute the draft requirements for High School education.

e. The instructional assessment system will be different from regular classes that means you cannot enter Taiwan's university using the Star Plan through Taiwan's College Entrance System.

f. Evaluate your children's language level prior to starting class. His or her Chinese abilities should be above the A1 level (<https://reurl.cc/zrV6W6>) and English abilities should be above the A2 level (<https://reurl.cc/eWrdOL>). Please also make sure he or she has the ability and motivation to self-learn.

Notice

1. This form will have two copies. One copy is for school and the other is for the student.
2. According to the rule:
point 1: Experimental education should be taken before students and their parents agree to sign the application form.
Point 2: Students or their parents will need to hand out the waiver form before being accepted.
Point 3: If student cannot handle the class, we will be required to ask students to drop the class.

- The first page will be kept by school, and the second page is for the student's own personal records.
- If you cancel enrollment, you cannot reenroll. Cancellations are final.

Appendix 5

International Class at Yangming High School

Course Architecture

The “International Class” will be taught bilingually in both English and Chinese (except for Chinese and English language courses) and will follow CLIL (Content and Language Integrated Learning) curriculum guidelines. Each CLIL course will follow the four fundamentals of the CLIL curriculum as outlined in the European framework: content, communication, cognition, and culture. These four C’s are paramount to the acquisition of knowledge and for facilitating critical learning skills across languages.

This “International Class” program will start from the 112 academic year and last until the 114 academic year, which means that the bilingual courses will cover student learning from their first year (111) to their completion of High School in year 113.

The following outlines the course map for the International Class at Yangming High School

- a. Ministry-mandated required courses: English, Math, and Physical Education are required courses. The subject English is instructed only in English. Math is instructed by bilingual teachers, and Physical Education is taught in Chinese. Foreign teachers will collaborate with the instructors according to the learning situations of students.
- b. Intercultural Communication courses : These courses are for students to recognize the history of the campus as well as the culture and ethos of the school. These classes include School Activities, Class Meetings, and an Elective Club.
- c. Academic-development courses (required) : Research Methods and Miscellaneous Academic Topic Exploration” are required courses at our school. These courses take two full years to complete. Students in the international class will be required to complete one full research paper as well as a presentation entirely in English.
- d. Elective subjects: For electives, students will be allowed to choose from the following courses: Mandarin Chinese, Social Sciences (which includes History, Geography, and Civics and Society), Science (which includes Physics, Chemistry, Biology, and Earth Science), Inquiry and Application of Natural Sciences, Arts and Life Sciences (which includes Music, Arts and Life, and Home Economics)” and Information Technology (which includes Computer Science and Living Technology). We cooperate with the Department of Chinese as a Second Language in universities and recruit their teachers to lecture Mandarin Chinese with the collaboration of foreign English teachers. Arts and Life and Information Technology are domain-specific courses on the curriculum guidelines taught in Chinese. Civics and Society is inquiry-based, and mainly focuses on SDGs issues; some units on international affairs are taught in Mandarin Chinese and English. The rest of the subjects are taught in Mandarin Chinese and English. Instructors of elective courses are able to collaborate with foreign teachers according to the learning situations of students.
- e. Individualized Curriculum : Students can arrange their own course map based on their pick of the modular courses offered. This way, students can tailor their courses to their individual learning needs.
 - (a) The courses that are elective and can be picked from include: Academic Research, Multiple Skills, Entrepreneurship, Test prep, SAT prep, preparation for studying abroad, and many more.
 - (b) Students can select courses after they appear in the online course selection system, however, we cannot guarantee a spot in the class since class sizes and offerings are limited. Unfortunately, that means course selection is on a “first come, first serve” basis and once the class fills up, we can’t allow any additional students past the limit. At the end of each semester, we will distribute and collect surveys from the student body and use these surveys to determine which elective courses will be offered in the following year.

(c) “Let students be their own master in learning” is our creed here at Yangming High School. In order for us to fulfill our mission, we encourage our students to embark on a journey of self-discovery in terms of academia. Students will be encouraged to think critically, use information learned in class to create new ideas, and synthesize and interpret information from across academic disciplines. We encourage our students to constantly ask questions. We also have a system to help our students choose classes at other schools for their individualized curriculum courses. This has been established according to a Taiwanese law called “Taipei City Senior High School’s Students to other school take course and transference” wherein students may elect to choose courses to attend at other high schools around Taipei City. This option is not limited to Individualized Courses but can include any courses students want to attend.

(d) All these courses (under the individualized course label) are optional and therefore include an extra charge for instruction that will cover, the hourly rate for the instructor, material fees, and expenses for renting equipment.

Photo : “International Class” course map

This course map shows how the Bilingual Class and International Classes cooperate with School-development required courses and Clubs. In this way, these two classes will still get to enjoy school life with other students in this school and ensures they will not be secluded or isolated from the rest of the student body.

Appendix 6

International Class at Yangming High School Courses' structure and academic credit

As a student in the International Class, the following are required subjects. Each semester in first and second grade there will be 17 academic credits. In the third grade, each semester will have 7 academic credits. In total you will get 82 academic credits over the course of three years.

Our school has a goal that we call the FIVE STARTS. These are self-development, teamwork, attention to society, international relations, and problem-solving. These required subjects are the basic academic foundation while elective subjects are intended as supplementary knowledge.

In our school we also offer clubs, alternative curriculum periods, and allow our students to choose the topics that they are interested in for their research. We have lots of events and activities to foster a strong community culture among the student body.
